Wastewater Services

For the Pharmaceutical Industry

Everyone at ***TM Deer Park Services*** is deeply committed to attentive service, regulatory excellence, and innovative solutions—qualities which have established us as a leader in waste water management for the Pharmaceutical Industry. Our mission is to provide effective solutions that are of great value and safe for the environment.

Delivering Safe & Effective Management of Pharmaceutical Wastewater

Examples of pharmaceutical wastewaters we accept:

- Water with toxic constituents such as metals
- Water with limited or "no-discharge" components
- Water with soluble and water miscible organics and solvents
- Water with acids, organics, and combinations

TMDP Lowers Risk for Pharmaceutical Manufacturers by Offering

- No discharge to waterways
- Non-recoverable waste disposal which ensures no re-entry into marketplace
- MACT and LOREX applications
- Safe and regulatory compliant facility

Additional Benefits of Our Services

- Large capacity —over 60 million gallons per year injected on average over the last five years
- Lower cost and more efficient than other technologies such as incineration
- Underground injection is an environmentally friendly, low carbon footprint disposal process which offers low air emissions, no discharge to waterways, and no risk to groundwater
- Permits allow a wide range of D, F, K, P, and U waste codes and constituents
- 24/7 acceptance of most waste streams
- Ability to process and inject 0-14 pH without neutralization provides cost effective management of streams by often eliminating the need for costly on-site treatment

Class 1 underground injection wells are safer than virtually all other waste disposal practices, according to the EPA.
